

THE UNIVERSITY OF OKLAHOMA
**College of
Medicine**

Department of
Pediatrics
Section on Endocrinology

Katy Duncan Smith, M.S.
Research Programs Coordinator
University of Oklahoma Health Sciences Center
Children's Hospital

Katy attended Austin College in Sherman, Texas and completed her Master of Science degree in Epidemiology and Biostatistics at the University of Oklahoma Health Sciences Center with her thesis, "Otitis Media in Oklahoma Children: The Role of Passive Exposure to Cigarette Smoke." Katy joined the section of Endocrinology at OU Children's Hospital in 2012 and currently coordinates Dr. David Fields' studies regarding maternal factors and breast feeding on the development of infant body composition. Previously, Katy worked in OU Family Medicine Research for twelve years with publications in childhood immunizations, human papilloma virus and cervical cancer, patient numeracy, and breast cancer risk. Her further interests include tobacco use cessation. She is a member of the Oklahoma Tobacco Research Center, the Society of Clinical Research Associates, the Oklahoma Physicians Research Resource Center, and the National Center for Policy Research for Women and Families.

Katy is the mother of two stellar kids and runs marathons. For fun, she travels the world and teaches biology to Oklahoma undergraduates.
